Timber Stool

RIGMAROLE

/ FURNITURE + PRODUCTS

A range of simple stools created to fill a strangely unfilled niche in the market, namely an electroplated bent wire frame with a solid spun timber seat. These stools were originally designed for Lucy Liu's Kitchen and Bar in Melbourne after identifying the need for a hard wearing stool with a small footprint.

Available in three different heights: the **R3** for standard table heights of 730mm, the **R4** perfect for a 900mm kitchen bench, and the **R5** ideal for spectator bars no less than 1050 mm high.

These stools are ideally suited to both domestic and commercial use.

FINISHES

Silver Olive Green

Black Gold
(featured above)
