

R6 | R7 | R8

Steel Stool

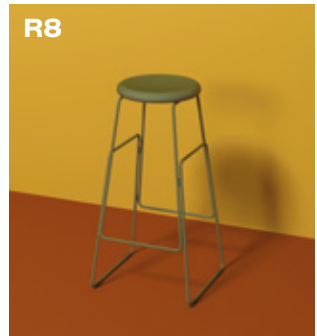

RIGMAROLE

/ FURNITURE + PRODUCTS

A range of simple stools created to fill a strangely unfilled niche in the market, namely an electroplated bent wire frame with a spun steel seat. These stools are a full metal version of the Timber Stools, **(R3,R4,R5)** maintaining the desirable small footprint but also even more hard wearing than their timber brothers.

Available in three different heights: the **R6** for standard table heights of 730mm, the **R7** high perfect for a 900mm kitchen bench, and the **R8** ideal for spectator bars no less than 1050 mm high.

These stools are suited to both domestic and commercial use.
